

## Inigo Financial Institutions Offering Summary

We aim to provide primary and low excess capacity for international financial institutions. We place a strong emphasis on a joint approach between underwriting and claims management to provide both consistent underwriting, and collaborative claims handling. Furthermore, we strive to provide market leading service levels and active client engagement via our single, central and nimble underwriting platform. Our broad appetite means we can offer worldwide primary lead terms, combined with underwriting and claims capabilities, that challenge both traditional global carriers and local in-market insurers.

We will embrace complex risks, working with brokers to provide solutions that combine a market-leading claims handling and underwriting team to provide a sustainable partnership for the long term.
