

# ENERGY LIABILITY

## WHO WE ARE

Through our Lloyd's syndicate, we work exclusively with the broker intermediary market, serving some of the world's largest commercial and industrial enterprises. Additionally, we provide reinsurance to leading insurers across the globe.

Data science is at the core of everything we do. The data we use and the models we build to run it, offer genuinely different and useful

perspectives on risk, propelling new understanding to enable better decisions.

A blend of experience and ambitious talent, our dynamic people are the heart of the Inigo experience. Our values of radical simplicity and low ego underpin truly exceptional relationships.

## OUR CLAIMS PHILOSOPHY

Visit any insurance company, and you'll see promises about fast payment and helpful people. To be frank, that should go without saying. To us, a high-quality claims experience means so much more than paying valid claims efficiently. It's about appreciating everyone is different and understanding your unique challenges. It's about building a partnership that trusts us to lead the way and take decisive

action – when and while you need us. And it's about proactively working to benefit members through analysis and creating innovative solutions. And yes. This philosophy is underpinned by our responsive and experienced claims team – based worldwide to provide visible, real-time support. Because some things really shouldn't remain unsaid.

## ENVIRONMENTAL, SOCIAL, AND GOVERNANCE

As a young business, we want to play an active part in the conversation on ESG, with our commitments growing as our business grows. We firmly believe that a strong ESG proposition is the right thing to do, creating engagement and value.

We are fully aligned with Lloyd's guidance on ESG, and will not insure thermal coal-fired power plants, thermal coal mines, oil sands and new Arctic energy exploration activities.

We are a new member of ClimateWise. As well as reporting against their principles, we will collaborate with our peers to help the industry move forward on climate risks, opportunities and responsibilities.
