WHO WE ARE

Inigo is a global specialty insurance and reinsurance company, built around the disciplined use of data and judgement. We turn analysis into insight, and insight into action – giving clients a clearer view of the risks we underwrite and the decisions we stand behind.

Our culture is grounded in openness, strong technical debate and sound underwriting judgement. That focus allows us to deliver clear, consistent outcomes clients can trust, even in complex or uncertain risk environments. Inigo became part of Radian Group in February 2026.

Our strategy is grounded in strong data and analytics, supported by initiatives such as our US Defense Counsel Survey, giving us early insight into emerging trends and helping us deliver thoughtful, practical guidance to clients. With engaged underwriters, disciplined risk selection, and informed decision-making, we offer fair, accurate pricing backed by a highly responsive claims team.

CLAIMS EXPERIENCE

We listen carefully to what claims are telling us. By turning experience, outcomes and data into clear insight through our analytics and ML platforms, we understand why losses happen – not just that they do. That insight strengthens underwriting, sharpens risk prevention and elevates client conversations. The result isn't just better data, but fewer surprises, clearer decisions and stronger outcomes – built around clients when it matters most.

At Inigo, claims sit at the heart of our business as a truly end-to-end service.

Data in Action

Turning insight into underwriting decisions.

By applying data thoughtfully alongside meaningful reinsurance capacity and expert claims handling we help bring greater clarity and confidence to challenging risks. The examples below show how this works in practice.

HORIZON

Horizon is Inigo's annual risk leadership programme. Each year, we bring together a select group of senior risk managers for open, data-led conversations about the risks shaping their businesses. The result is a deeper, more transparent relationship between insurer and client - and a sharper, more informed view of risk on both sides.
