Inigo Bond Protect

BUILT FOR TODAY'S FINANCIAL CRIME ENVIRONMENT

The US bond market is underserved by the traditional bond policies currently on offer. Financial crime seems to take a backseat in priority to the liability covers and as such has not benefited from a modern product to suit the threats of the modern world. At Inigo, we are recognised as leaders in Financial Lines insurance, combining deep technical underwriting expertise with a relentless focus on data-driven decision making.

Our commitment to innovation is matched only by our dedication to building and sustaining longstanding client relationships. We pride ourselves on delivering forward-thinking solutions, leveraging advanced analytics and market insight to provide our clients with unparalleled protection in an ever-evolving risk landscape.

This policy provides comprehensive protection against a wide range of financial crime exposures, including digital asset losses, social engineering fraud, and traditional crime risks. Inigo Bond Protect is crafted to offer clarity, flexibility, and global reach, ensuring clients are protected against both established and emerging threats.

ADDITIONAL COVERAGES

Full limit social engineering fraud cover

Coverage for losses resulting from financial fraudulent instructions or impersonation schemes

Digital assets coverage

Protection for direct financial loss of digital assets for which the insured is legally or contractually responsible

Specified consequential loss

Coverage for interest payable to clients and loss of certain privileges due to a covered event

10 REASONS TO CHOOSE INIGO BOND PROTECT
